

As corporate theft and forgery spiral throughout the world, this growth has been matched by the demand for protecting almost any product that can be manufactured.

We have extensive experience in the manufacture of high security coated products and continue to develop security solutions at the request of our customers. We can offer security coatings, lamination or conversion, as well as a range of customised security features.

Renowned for our quality and manufacturing excellence, we are regularly asked to partner with companies in order to develop new coatings for a wide range of materials and applications, across many different spheres of business.

When your organisation requires a completely bespoke coating process, **brand authentication or evidence of tampering**, Tullis Russell Coaters are the preferred choice.

**FEATURES**

- 2 metre wide coating facilities.
- State of the art cutting and sheeting.
- Ability to coat paper and film.
- Opaque and coloured coatings.
- Print-receptive coating for inkjet and Indigo, as well as coloured and silicone coating.

- Stripe coating.
- Finishing in sheets or reels.
- Integrated secure paper supply chain.
- Facility to flexo print images under coatings.
- Range of security features - see 'security features' insert.

BENEFITS

- Small and bespoke runs possible.
- Manufactured in a totally secure environment.
- Security combinations tailored to customer requests.
- 200 years of coating experience.
- Technical expertise and extensive security printing knowledge.

SECURITY IS OUR WATCHWORD

We operate a Chain of Custody. We do everything in-house and on one site, maintaining security and integrity throughout the lifecycle of the product. Just as important as our paper's security features is the way we maintain the security of the supply chain.

- We only sell our products to qualified and authorized printers and packaging converters.
- Our security customers have to agree to follow our Chain of Custody policies.
 - secure storage.
 - production documentation.
 - waste management.

Working with brand owners, printers and finishers, we ensure that these standards are maintained, without fail.
