Experience and Capability

Our technical curiosity, challenges in the market place and Tullis Russell's capability drive us to develop and continuously expand on our core capabilities. At least 20% of our revenue comes from new business development each year.

Our people

“Being employee-owned gives us a greater motivation to succeed because it’s our company as well; it’s not just someone else’s company”.

(Joe Bloggs, Finishing Department)

“Tullis Russel offers endless opportunities to push yourslef as a professional by taking on different challenges within a rapidly developing business”.

(Joe Bloggs, Sales Department)

“Tullis Russell has offered me great personal and career growth. For me, the most rewarding part is growing through challenging projects and working with a supportive team”.

(Joe Bloggs, Opetions Department)

Research & Development

Working in partnership to find solutions comes naturally to us. We are motivated to overcome challenges and our flexible, personal approach means we can innovate and experiment to provide real solutions. Our people and depth of technical talent are the reason for our success. We are therefore, committed to investing in our employees to equip them to do the best job possible.

Rely on us for the long term

With over 200 years of history behind us our sights are fixed on the next 200 years and beyond. Our ownership structure lets us take a long-term view without the short-term pressures often imposed by external shareholders. This is reassuring for our customers, suppliers and employees. It means we can plan for the future, think beyond our own business and consider our wider responsibilities.

Water Based Coating Technology

>

Functional and barrier coating technology that improves sustainable practices by reducing waste, providing product protection and using fewer raw materials.

Environmental Leadership and Sustainability

At Tullis Russell, we operate within the framework of an integrated and externally certified sustainable management system.

We are a responsible and ethical business partner and aim to provide the highest service and quality levels for our Customers, whilst minimising our impact on the environment. We are committed to ensure compliance with our legal and other requirements and support a culture of continual improvement. These principles are integrated into our supply chain management to ensure our raw materials are purchased from a responsible and sustainable source.

We offer FSC® certified materials and our FSC® certification provides global customers the ability to choose products sourced from social and environmentally responsible forests. In addition to this, our site in Korea conforms to the Oeko-Tex standard which ensures the responsible and sustainable use of chemicals within textile manufacture.

Water Based Coating

From a solely water-based coating platform, we are able to provide our partners and customers with high quality solutions whilst having minimal effect on our environment. Our functional and barrier coating technologies can improve sustainable practices that reduce waste, provide product protection and utilise fewer raw materials.

Sustainable Manufacturing

At Tullis Russell, we are committed to ensuring sustainability in our operations. We develop our processes to reduce the use of resources and we find the best ways to treat any waste with minimal effect to our environment.

Our sustainability programme allows us to set goals for continual improvement and meet the requirements of ISO 14001. Our sites are ISO 14001 certified which means we have an environmental management system in place which allows us to monitor and continually improve our environmental performance.

NEWS

Count on us to try harder

Our ownership structure means that everyone in the business has the opportunity to contribute to, and benefit from, our success.

This leads us to deliver the very best for our customers, our fellow employees and our local community.

EO EMPLOYEE OWNERSHIP
BETTER BUSINESS

A different kind of company

In 1986 the Russell family started a ground-breaking process, whereby the ownership of the company would transfer to its employees.

The move towards employee ownership was a decision inspired by the strong personal belief of our then Chairman, David Erdal. He saw that employee ownership was a healthier, more satisfying company structure for employees and management, and that it would lead to deeper levels of employee engagement and higher levels of customer satisfaction than could be achieved within a traditional shareholder or privately-owned structure. This is perfectly aligned with the guiding philosophy of The Russell Trust.

Today, 70 per cent of our ordinary shares are now owned by employee ownership trusts with the balance being held by The Russell Trust.

What this means for you

A trusted Partner for your business

As employees owners we take pride in what we do. We believe in what we're doing and how we're doing it. Our values drive our behaviour, so you can trust us to do the right thing for the right reasons, not simply to suit shareholders or achieve short-term gain.

Committed for the long term

When you work with us we believe you'll see that our people try harder to deliver exceptional products and service because that's what partnership is all about. We're committed for the long term and we don't want to let you down.

Expect quicker decisions

When you deal with any of us, you're speaking to an owner of the company. That means you benefit from quicker decisions because we're appropriately empowered to come up with solutions and know our business inside out.

Solutions through innovation

Working in oartnership to find solutions comes naturally to us. We are motivated to overcome challenges and our flexible, personal approach means we can innovate and experiment to provide real solutions.

The Russell Trust

The Russell Trust is a Charitable Trust supporting a brad range of local charities. Every year it donates significant amounts to hundreds of different charities and educational institutions.

It operates under a guiding philosophy to keep Tulliss Russell independent and by so doing keep it flexible and responsive to its customers. Decisions are based on the best interests of our customers, our suppliers and above all, our employees.

Our Vision

To be the world’s leading creative and environmentally responsible coatings company.

About us

The story behind Tullis Russell is what makes us different.

We operate a sustainable, employee owned business, which at its heart has a deeply held belief that working in partnership with our customers is better for us, and for you.

Tullis Russell has two major manufacturing sites, one in the UK and one in South Korea, each of which has developed market leading expertise in its own field and is trusted by leading brands in over 120 countries.

From our plant in Bollington, Tullis Russell operates a leading international Coating and Converting company. Thanks to our multi-layer coating technology we are able to simultaneously apply different coating layers. We have a wealth of expertise in manufacturing silicone and adhesive coatings with extensive capabilities for contract coating and lamination, allowing us to remain at the forefront of paper and film development.

Our textile and ceramic transfer papers are manufactured at our state-of-the-art facility in South Korea. Our market leading ranges of trucional® and trutextile® papers are used by top ceramic and textile printers to create products for some of the world’s biggest brands.

Manufacturers of high performance self-adhesive materials for over 15 years

Traditionally focused on supplying the high security print industry, our technical team have used their extensive knowledge and experience of laminate constructions to produce the Tullis Russell Labelstock range.

Labelstock solutions

By combining a range of face materials, adhesives and release liners, we are able to offer Labelstock solutions to suit a variety of applications; including industries such as food and beverage, health and personal care, logistics, electronics, industrial and many more.

In addition, if it is just the face material you require, we can supply a range of label face papers to suite your specific labelling needs.

[VIEW TRLABEL PRODUCTS >](#)

[VIEW TRLABEL SERVICES >](#)

Inside a label

Whether you are looking for a self-adhesive paper or film, the four components of the face stock adhesive, silicone coating and release liner must all work together in order to produce the high performance label material you require.

1. Face Stock

Range of standard papers and films for all conventional or digital printing processes.

2. Adhesive

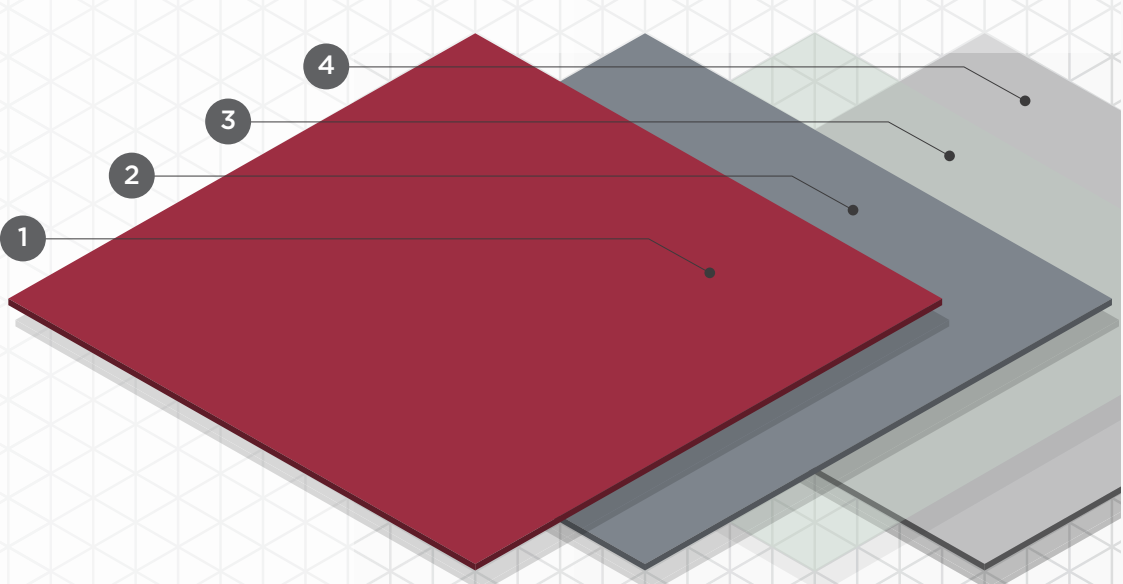

Range of adhesives available, from permanent to removable grades.

3. Silicone

Silicone coated release liners designed to provide easy - tight release.

4. Release Liner

Our release liners offer ideal performance properties for processing on all conventional flat bed and high speed die cutting machines.

PAPER LABEL PRODUCTS

We offer a wide range of paper materials at various weights which are suited to all conventional printing methods. In addition to these standard paper grades, we also offer specialised materials for specific applications or individual needs.

[FIND OUT MORE >](#)

FILMIC LABEL PRODUCTS

We offer a range of filmic materials at various weights, colours and finishes, which are suited to all conventional printing methods. In addition to these standard filmic grades, we also offer specialised materials for specific applications or individual needs.

Label stock solutions with no limits.

At Tullis Russell, we manufacture and source high performance paper and film label materials in a range of weights and sizes, which we can then laminate with one of our many high performance adhesive grades.

We have developed a range of standard products to provide our customers with quick and reliable access to the more commonly used labelstock grades in the market. However, we source a range of face materials, adhesives and liners, so our range is essentially limitless.

Our products can be supplied in a variety of sizes ranging from 1530mm wide rolls, to narrow width and short length rolls. Dependent on customer requirements, we can often sheet to your specified sheet sizes too.

Labelstock Services

At Tullis Russell, we support our customers in every way we can. We pride ourselves on our extensive technical capabilities and ensure our customers always receive the utmost technical support.

Our customers have direct access to our dedicated Research and Development team. This, coupled with our state of the art lab equipment, we work in partnership with our customers to find solutions to their labelling needs.

In addition to this, we offer a pre-slit range of standard products which allows our customers to select the products they need, at the sizes they require, and these can be delivered in a short time.

Paper Label

We offer a wide range of paper materials at various weights which are suited to all conventional printing methods. In addition to these standard paper grades, we also offer specialised materials for specific applications or individual needs.

Click on a range below to see the products and their specifications.

COATED

A one side semi-gloss coated finish facestock with a bright, clear and smooth printing surface. Semi-gloss papers are suitable for use in general product labelling, particularly within the retail sector.

SHOW MORE >

UNCOATED

An uncoated, high white, woodfree, face paper. Typically used in commodity labelling and ticket materials, vellum papers are particularly suitable for thermal transfer printing methods.

SHOW MORE >

THERMAL ECONOMY

A white, non-top coated, standard sensitivity direct thermal face paper, with a black imaging thermosensitive coating. Typically used for information labelling within dry environments such as food weighing and point-of-sale.

Combined with either a permanent or a removable adhesive, these labelstock materials are an excellent material choice when labels are required for short life applications, e.g. in-store food labelling.

TOP COATED THERMAL

A white, topcoated direct thermal paper, with a black imaging thermosensitive coating. The coating provides a protective layer, providing excellent resistance to moisture, grease and solvents, etc.

SHOW MORE >

INKJET

Our range of inkjet printable label materials enable label printers to create small batches of labels on cost-efficient inkjet printers. These materials are used mainly for commercial inkjet printing and are compatible with water-based inks. We do recommend that materials are tested on your individual printer before purchase.

SHOW MORE >

COPY/LASER

Our range of laser compatible materials are laminated to a kraft liner and offer exceptional lay flat properties. Once converted, these individually cut, self-adhesive labels are used in businesses all over the world to satisfy many tasks such as organizing offices, sending mail and packages and identifying media.

SHOW MORE >

BLOCKOUT/OPAQUE

Speciality papers, offering a wide range of over-labelling functions, masking the printing beneath. The range is specially formulated for self-adhesive lamination and is available in 3 different colours; blue, grey and black. We offer a wide range of grammage and base papers, e.g.; high gloss, laser, cast coated, vellum and machine coated.

SHOW MORE >

Bespoke Products

The versatility of our coating machines enables us to offer a combination of virtually any release liner, adhesive and face material to suit your requirements. In addition, we are also able to offer contract coating, development of multi-layer constructions and strip coating.

< Back to About TRLabel

Speciality Products

With over 175 years of coating and converting experience for various industries and end applications, we have the ability to apply a wide range of coatings to produce exclusive customised products to suit your specific needs.

Whether your product needs to offer a high degree of chemical or heat resistance, provide enhanced print performance or even include a complex security feature, we can work with you to find a coating solution. The versatility of our coating machines enables us to offer a combination of virtually any release liner, adhesive and face material to suit your requirements. In addition, we are also able to offer contract coating, development of multi-layer constructions and strip coating.

Some examples of our Speciality Materials:

TRANSFER TAPE

When a material needs to be made self-adhesive, we are able to manufacture a transfer tape that our customers can apply to their specified material. This construction is often utilised for picture mounting, bonding and security package that require a seal.

[DOWNLOAD DATA SHEET >](#)

PHARMACEUTICAL LABEL MATERIAL

Top-coated direct thermal paper, with a black imaging thermosensitive coating. The coating provides a protective layer, providing excellent resistance to moisture, grease and solvents, etc. Combined with our specifically formulated removable adhesive, this label material is suitable for use across pharmaceutical plastic containers, kraft bags and coated boxes.

[DOWNLOAD DATA SHEET >](#)

MULTI-LAYER LAMINATES

Multi-layer constructions replace the need for having several different labels. We can manufacture label material that provides two self-adhesive layers; the top layer can be peeled away and applied to another substrate whilst the intermediate layer stays behind on the labelled surface. Typical uses for these types of laminates are in the pharmaceutical, logistics and direct mail/promotions industries

[DOWNLOAD DATA SHEET >](#)

METAL DETECTABLE LABEL MATERIAL

These label materials have been specifically designed for use in a variety of markets where metal detection is necessary. These materials are also often used when a barrier is required to stop destructive oils or other substances from leaking through the adhesive layer and into the face material and therefore damaging print quality. Typical applications include meat tagging, fruit labels and tyre labelling.

[DOWNLOAD DATA SHEET >](#)

RECORD LABEL MATERIAL

Tullis Russell is the preferred supplier when record label printers are producing the central label for vinyl records. It is resistant to curl and combustion during the vinyl pressing process. Supplied blue/white for ease of identification – blue side is applied to the vinyl.

[DOWNLOAD DATA SHEET >](#)

DIGITAL RECEPTIVE MATERIALS

As the use of digital print methods continues to increase, we are able to provide various formulations of digital receptive coatings, enabling more and more substrates to achieve high quality print results when printing digitally. We are regularly asked to partner with companies to apply our knowledge and experience in order to develop coatings that optimise the performance of the substrate in line with their chosen digital technology.

[DOWNLOAD DATA SHEET >](#)

BEVERAGE LABEL MATERIAL

We supply a prestigious range of face materials that are specifically designed for the beers, wines and spirits market. These materials incorporate uncoated, textured, laid, woven and wet strength grades in combination with any adhesive and any liner.

[DOWNLOAD DATA SHEET >](#)

OUR CAPABILITIES

- 2 metre wide coating facilities
